EDUCATION

2019 - 2024
WOLKITE UNIVERSITY

BSc in Software Engineering,

Red Hat System Administration and Red Hat Applications Development in Java EE.

NDG Linux Essentials certifications from Cisco Networking Academy.

SKILLS

- Front-End Development: React , React Native , Flutter
- Back-End Development: Node.js , PHP , Java , Python
- Databases: MongoDB , MySQL , Firebase
- Graphics: Photoshop

LANGUAGES

- Afaan Oromo: Fluent
- Amharic: Fluent
- English: Fluent

PROFILE SUMMARY

Innovative and detail-oriented Software Developer and Competitive Programmer with a strong background in software development and algorithmic problem-solving. I am involved in Wolkite University ICT Incubation and the WKU ICPC team, where I have honed my skills in various programming languages, collaborative projects, and competitive coding, proven track record of developing effective software solutions and contributing to the success of national programming contests. Passionate about leveraging technical expertise to solve complex problems and drive technological advancements.

WORK EXPERIENCE

Wolkite University ICT center WKU ICPC Team   **2021 - 2024**
Software Engineer and Compititive Programmer

- **Software Development:** Developed software projects within the ICT incubation center, using programming languages Javascript with MERN stack framework
- **Problem Solving:** Participated in regular competitive programming contests, solving complex algorithmic problems and improving coding efficiency.
- **Team Collaboration:** Worked closely with team members to design, implement, and test software solutions, enhancing collaboration and project management skills.
- **Achievements:** Contributed to the team's success in national ICPC contests, earning recognition for problem-solving skills and teamwork.

Information Network Security Administration of Ethiopia (INSA)   **FEB - JULY 2023**
Software Development Intern

Febubrary 2023 - July 2023
Completed four-month undergraduate intern program at Information Network Security Administration of Ethiopia (INSA) with MERN stack project development. Developed a Store Management system manage multiple store of merchants.
